

FOR NURSERY PESTICIDE APPLICATIONS ONLY

Worker protection regulations require that nursery employers take steps to reduce risks of pesticide related illness to employees. These responsibilities lie with the nursery management. Commercial applicators (PCO's) employed by nurseries to conduct applications also have specific responsibilities under worker protection regulations.

Licensed Applicator Responsibilities	Nursery Responsibilities
<p>Licensed applicators must report the following information to the nursery management:</p> <ol style="list-style-type: none"> 1. Specific location and description of the pesticide treated area 2. Time and date of the application 3. Product name, EPA registration number, active ingredient 4. Restricted Entry Interval (REI) 5. Notification requirement (oral/posted notice or both) 	<ol style="list-style-type: none"> 1. Pesticide safety training 2. Decontamination 3. Notice about applications 4. Prohibit employees from entering treated areas during the restricted entry interval (REI) <p><i>Contact the Nevada Department of Agriculture for details about these provisions. South (702) 486-4690 North (775) 688-1182</i></p>
